

**USING MAXIMO TO PLAN AND SCHEDULE
ROUTINE AND OUTAGE MAINTENANCE WITH MICROSOFT PROJECT
AND OTHER THIRD PARTY SCHEDULING TOOLS**

This course is designed for MAXIMO users that want to be able to use the data from MAXIMO to plan and schedule work. The course will focus on the correct configuration of MAXIMO to support planning and scheduling and include the processes that need to be in place to build successful schedules. The following are some of the topics that will be address:

- * Planning and scheduling practices centered on MAXIMO
- * Configuration of MAXIMO to support planning and scheduling
- * How to build routine weekly and monthly schedules with Microsoft Project
- * How to build outage/overhaul schedules with Microsoft Project
- * Using other scheduling tools with MAXIMO
